DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 15-16, 20-21 and 23-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rao, 6,041,389.

Rao, 6,041,389, discloses in Fig. 2 a computer system comprising:
nonvolatile ferroelectric random access memory (FRAM) cell arrays 202 of 32 megabits
(see lines 57-67, column 5);
volatile content addressable memory CAM array 207 of 4 bits (see lines 1-7, column 7);
address buffer/latch 206 for storing row address words (see lines 1-5, column 6)
data bus 208;
address bus 209;
CPU 101 as shown in Figs. 1A and 1B (see lines 7-17, column 4);
control signals RAS, CAS and system clock signal (see lines 24-30, column 8).

What is not shown in Rao, 6,041,389, is the address table and the data table as recited in claim 15.

However, since address buffer/latch 206 storing row address words from volatile content addressable memory CAM 207 and providing row address words to nonvolatile ferroelectric random access memory (FRAM) cell arrays 202, therefore, it would have

been obviously included an address table and an data table as recited in claim 15 as well known in the art of content addressable memory CAM.

Allowable Subject Matter

3. Claims 1-14 are allowed.
4. Claims 17-19 and 22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. The following is an examiner's statement of reasons for allowance:

The method of operating a memory circuit as recited in claims 1-14 and the address table pointer as recited in claims 17-19 and 22 has not been found in the prior art.

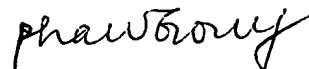

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to TRONG PHAN whose telephone number is (571) 272-1794. The examiner can normally be reached on M-F (8:30-5:00).
